

## **Duke Energy – Comments on Key Documents**

### **Delivery Point in the Master Energy Supply Agreement**

In the MESA, the “Delivery Point” means the [AEP Load Zone] as defined within PJM. Is this the AEP Zone that is identified by PJM as PNODE #8445784? If so, this zone includes load in OH, IN, KY, WV and VA. There seems to be a disconnect between this node and what is stated in the Stakeholder Workshop presentation.

The presentation says AEP Load Zone is the delivery point in the Master Energy Supply Agreement representing the aggregate area of consumption for AEP Ohio within PJM.

Is it AEP’s intent to create a new AEP Ohio-only Load Zone or to use this aggregate zone? Our preference is to use the already established node since there is historic data at this point.
